

## **Playing against an under-strength team**

Your team will be awarded the set as a 3-0 win, therefore receiving 1 point for the set and 3 legs for your team.

Your player can elect to (A) receive their running average or (B) play for their average.

(A) Enter your players name only. There is no need to enter anything in the name box for your opponent's player but "Bye" and "No Player" are both acceptable.

(B) Your player MUST complete 3 legs IRRESPECTIVE of the scores hit by a stand-in opponent (if there is a stand-in opponent). In other words, they MUST score 501 and finish on a double in all 3 legs. It does not matter if anyone plays against them as the "opponent's" scores do not count and the leg should not end because the stand-in opponent "wins" it.

Should your player choose (A) but you want them to play a game then by all means do so as a friendly. If you use your computers for scoring purposes please delete all the scores for the friendly set before sending in the results.

Call me if you are unsure.
